

“ We’ve been on a long journey with SAP. There’s been a lot of growing and there’s still a lot of growth to be done. However, SAP Business One is an infinite tool, the possibilities are endless!”

Kajal Patel – General Manager of Patronics Services

THREE COUNTRIES

with offices and operations united via SAP Business One

SAP BUSINESS ONE IS ENGINEERING ENDLESS OPPORTUNITIES

Patronics Services has established itself as a leading electrical engineering company in the COMESA region. Working together with ACeTeK and SAP Business One, Patronics Services now has a strong system in place that removes manual processes.

Objectives

- Previously all Patronics Services’ processes were manual.
- Important data and information was not easy to access.
- Patronics Services required ready to go ERP software rather than building a platform from scratch.

Why SAP and ACeTeK

- SAP Business One was referred to Patronics Services by an UN employee.
- ACeTeK came highly recommended and provided a project management module, which is important in the electrical engineering industry.

Benefits

- SAP Business One has become a one stop shop for Patronics Services.

- All processes are now automated.
- Accurate, real-time information can be pulled directly from SAP Business One rather than relying upon individual staff members.
- Staff can access the system from anywhere, at any time, which is important to staff who frequently travel for work.
- Patronics Services has implemented significant operational changes thanks to SAP Business One.
