

“ SAP Business One is a flexible and integrated ERP system. All our functions and departments are now accessible through a single platform.”

Shyam Raval – Executive Director of Raval Steel

**AUTOMATION BLISS**  
thanks to SAP Business One

**REINFORCING INFRASTRUCTURES WITH SAP BUSINESS ONE**

Ethiopian commercial and industrial steel manufacturers, Raval Steel, requested ACEteK's help with the implementation of SAP Business One to consolidate factories. Now, Raval Steel can produce high-quality solutions more efficiently.

**Objectives**

- Previously, Raval Steel's network infrastructure was poor.
- Factories were not coordinated.
- Processes were manual, which were time consuming and occurred human errors.
- A new flexible ERP was required to provide consolidation between factories and automate processes.

**Why SAP and ACEteK**

- SAP Business One could help with poor network infrastructure.
- Both ACEteK and SAP Business One have experience working in Ethiopia.
- ACEteK could help customize functionality to suit the specific needs of Raval Steel.

**Benefits**

- Since implementation, factories are now consolidated on a single platform.
- Everything is fully automated, saving time and inaccuracies.

- SAP Business One allows cost spaces to be allocated to specific assets.
- Huge time savings have been made thanks to the Weighbridge integration.
- Stock management and inventory storage have improved, increasing productivity and reducing costs.
- Production has increased and waste has minimized.
- Business processes are more efficient.
