

FOOD CANNERS LTD

## IMPROVED CONTROL AND ACCURACY

made possible with SAP Business One

“ ACeTeK and SAP Business One are the right partners to help us with our expansion in Mauritius.”

Dick Li Wan Po – Deputy Managing Director of Sunny Food Canners

## SAP BUSINESS ONE PRESERVES CUSTOMER RELATIONS SEAMLESSLY

As one of the leading manufacturer of food products in Mauritius, it's important for Food Canners to always stay on top of the competition. Since implementing SAP Business One with the help of ACeTeK, Food Canners has been able to be more flexible and offer customized deals to its trade customers.

### Objectives

- Previously there were two different systems in use.
- Food Canners Ltd was growing at a rapid rate.
- There was a lack of accuracy regarding product costing.
- New software was required that could improve management and control of the business.

### Why SAP and ACeTeK

- SAP Business One provided the efficiency and business growth

support that Sunny Food Canners required.

- ACeTeK offered a clear solution to the challenges facing the company and implemented SAP Business One within the project deadlines and efficiently.

### Benefits

- Since implementation, customer relationship management has improved.
- Readily available manufacturing data allows the company to make more informed decisions.

• Real-time data, information and reports on production are easily accessible.

• With SAP Business One, the exact cost of a product batch is available at a click.

• With margin being squeezed, the company can maximise its sales through customized deals and based on the exact cost of product batches.

• With the up to date management information, the company can easily track over or under spending per project.
